EASYCOV

RAPID AND RELIABLE SALIVARY SCREENING TEST FOR COVID-19

Objectives

SkillCell and Sys2Diag/CNRS, using their technological expertise and resources, have developed **a rapid and reliable saliva test, called EasyCOV**, dedicated to the fight against the Covid-19 pandemic.

Applications

- Medico-social establishments
- Laboratories
- Companies
- Transport (land, air and sea)
- Event

Functionalities

RELIABLE

- Sensibility: 86%
- Specificity: 99%
- Effective on variants

SIMPLE & PAINLESS

- Virus detection based on saliva analysis
- Simple and guided implementation with the EasyVID machine
- Easy to use without the need to go to a medical laboratory.

FIELD

- Requires ready-to-use and disposable consumables
- With the EasyVID machine, the EasyCOV test can be carried out in an operational environment (Airports, Stations, Sports structures, EHPAD...).

FAST

- Test result in 40 minutes
- Immediate visual reading of the result by colour recognition.

RELIABLE | SIMPLE & PAINLESS | FAST | FIELD

Specifications

EASYCOV KIT

Pasteur pipettes
Sampling

Capillary tubes
Transfer between tubes

Reading grid

Amber tubes
Pretreatment

Transparent tubes
Amplification

Red tubes
Colorimetric detection reagent

KIT CONTENT

Pasteur pipettes	35
Capillary tubes	70
Bulbs	2
Amber tubes	35
Transparent tubes	35
Red tubes containing the colorimetric detection reagent	2
Reading grid	1

STORAGE CONDITIONS AND SHELF-LIFE

4°C	Up to 3 weeks
- 20°C	Up to 7 month
